

Focus Areas

Hybrid and Electric Vehicles for India(E-Mobility - Road, Rail, Metro & Drones)

International Standards for EVs and their impact on EV deployment, R&D and manufacturing in India(Future Trends and Market in EV deployment)

EV System architecture concepts

EV Motor drives and controllers

Storage Systems & New Battery Technologies, Potential and Forecasts

EV Charging Systems (Smart Grid, Charging Infrastructure and V2G)

Power grid and renewable energy resources interfacing for EV

Development (ICT services for EV ecosystem)
