

The International Conference on Innovations in Thermo-Fluid Engineering and Sciences [**ICITFES - 2020**] has the objective to bring academicians, scientists, and researchers together who are engaged in research and development of thermo-fluid systems and their applications in various fields of engineering and science and to disseminate their research findings. The conference theme will not only cover the topics that are listed in the brochure; but also the areas which are relevant to the thermo-fluid systems and their applications.

It is anticipated that the conference will appeal to a wide range of disciplines. Plenary and keynote lectures and oral presentation of research papers will be delivered in parallel sessions so as to enable the participants to interact during the conference.

Publications: Selected papers from the conference will likely to be published in the following International Journals/Special Issues.
