

ABOUT THE CONFERENCE

The Department of Production Technology is organizing an International Conference on Recent Innovations in Production Engineering (RIPE 2017) in line with the various national conferences and workshops conducted in the past in the area of manufacturing, design, mechatronics, automation and inspection. The noble aim is to bring together the professional and budding researchers on a common platform to discuss and exchange the ideas on recent developments and challenges in field of Production Engineering.

This will provide opportunity to researchers to grade their work, to learn new methods of experimentation and analysis and to new directions in their research and organization. It also aims to share expert overview in selected research field through key note lectures to be delivered by eminent speakers from India and abroad. The themes of the conference are:

- **Advanced Manufacturing**
- **Composites and newer materials**
- **Coating and Material Joining**
- **Production Management**
- **Simulation and Automation**
